

## EN3 Panel System

### Dimensions:

- EN3 is a slim panel system of 30mm thick with square trimming in anodized aluminum and zinc alloy caps.
- EN3 panels are available in 14 standard widths (400mm, 450mm, 500mm, 600mm, 700mm, 750mm, 800mm, 900mm, 1000mm, 1200mm, 1400mm, 1500mm, 1600mm and 1800mm) and 4 standard heights (875mm, 1200mm, 1600mm and 2000mm)

### Choice of Material:

- EN3 panels are available in monolithic or segmented look with choices of finishes including tackable fabric, melamine, laminate, aluminum tool rails, tempered glass (clear, grey-tinted and sand-blasted), painted steel, embossed steel and perforated steel with or without acoustic absorbent material infill.
- 4mm add-on glass (clear, grey-tinted and sand-blasted) is available to offer additional visual interest and functional separation.

### Application:

- EN3 panels are available in floor standing, desktop and hanging configurations.
- With an option of 3-way and 4-way connecting posts, EN3 offers flexible configurations of 120 degree and 90 degree workstations.
- Hanging shelves and cabinets in widths 800mm and 900mm are available.

### Connections:

- Metal-to-metal connections between EN3 panels not only provide sturdy enclosure for each cubicle, but also offer flexibility for relocation.
- PP stripes are used as light seals between panels.

- EN3 and EN6/EN8 can be integrated to offer functional and aesthetic-pleasing workstations with 30mm x 60mm / 80mm uniquely-designed connecting posts which could be floor to ceiling height when used as down pole for cabling.
- EN3 panels provide structure to EN6/EN8 spine panels in wing-panel applications with work surfaces at level 720mm or 750mm.
- EN3 panels can be connected on or off-module.

### Cable Management & Accessories:

- EN3 offers optional cable management at skirting with removable covers. Cables are laid in rather than threaded through structure.
- A large collection of accessories, including paper tray, pencil jar, CD rack, document sorter, magazine rack, telephone tray, photo frame, name tag, coat/picture hanger and articulated support arm for flat-screen monitors, are available.

### Performance:

- EN3 has been tested and proved to comply and exceed the requirements of ANSI / BIFMA X5.6 on structural performance and X7.1 on low emission.
- EN3 is GECA-approved.
- EN3 can contribute to LEED certification.
